Introduction

Experience as the Foundation for Design

From design to delivery.

Practice as the Starting Point

Convexarchitecten guides clients throughout the entire development and construction process. From the initial concept and feasibility study to design, execution, and completion, we bring together design, technology, and process.

Working Together on Development

For area visions, masterplans, feasibility studies, and site studies, we work closely with clients, consultants, and other partners.

Our Designs Emerge from the Brief

We seek solutions that combine architectural quality with functionality, feasibility, and efficiency.

Sustainable and Future-Oriented

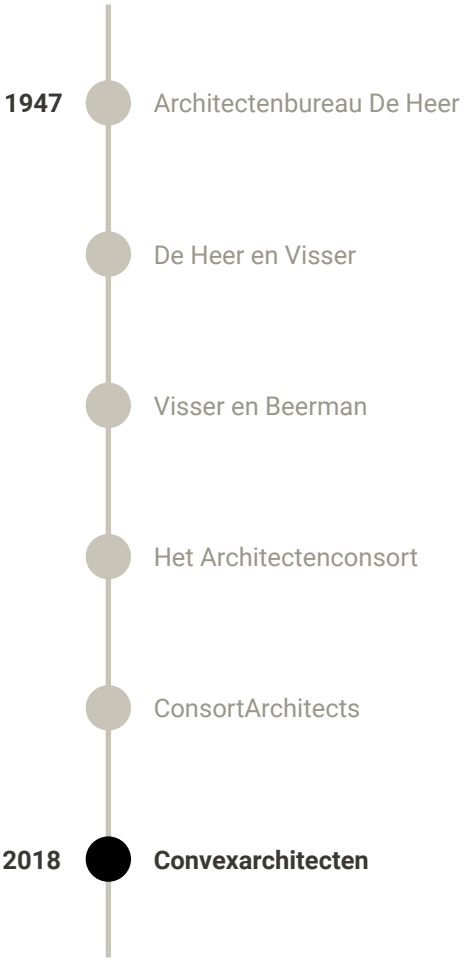

As architects, we are aware of our responsibility towards people and the environment.

1947

Founded in Rotterdam — more than 79 years of experience.

OUR HISTORY

79 years of experience under a new name.

Part of CONIX GROUP NV

Since 2023, Convexarchitecten has been part of CONIX GROUP NV. Within the group, we collaborate with Rothuizen Architecten en Adviseurs, BouwmeesterPro, and CONIX RDBM Architects, each with its own area of expertise, while maintaining our individual names, teams, and ways of working.

EXPERTISE

Commercial Real Estate as Our Core Expertise.

One of Convexarchitecten's key areas of expertise is commercial real estate. Drawing on extensive experience in logistics, business operations, and spatial development, we design efficient and sustainable buildings tailored to the specific requirements of each user.
We strive to create an optimal relationship between the building, business processes, and its surroundings, with careful consideration for construction costs, project timelines, and future flexibility.

Logistics & Distribution

Wholesale

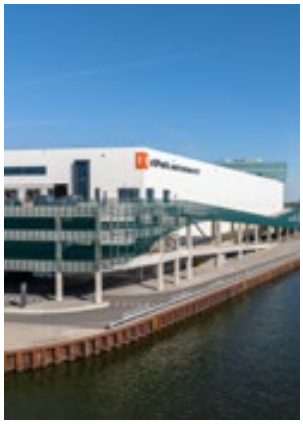

Manufacturing & Industry

Fresh Produce & Food

SME Units

Multi-Storey Commercial Buildings

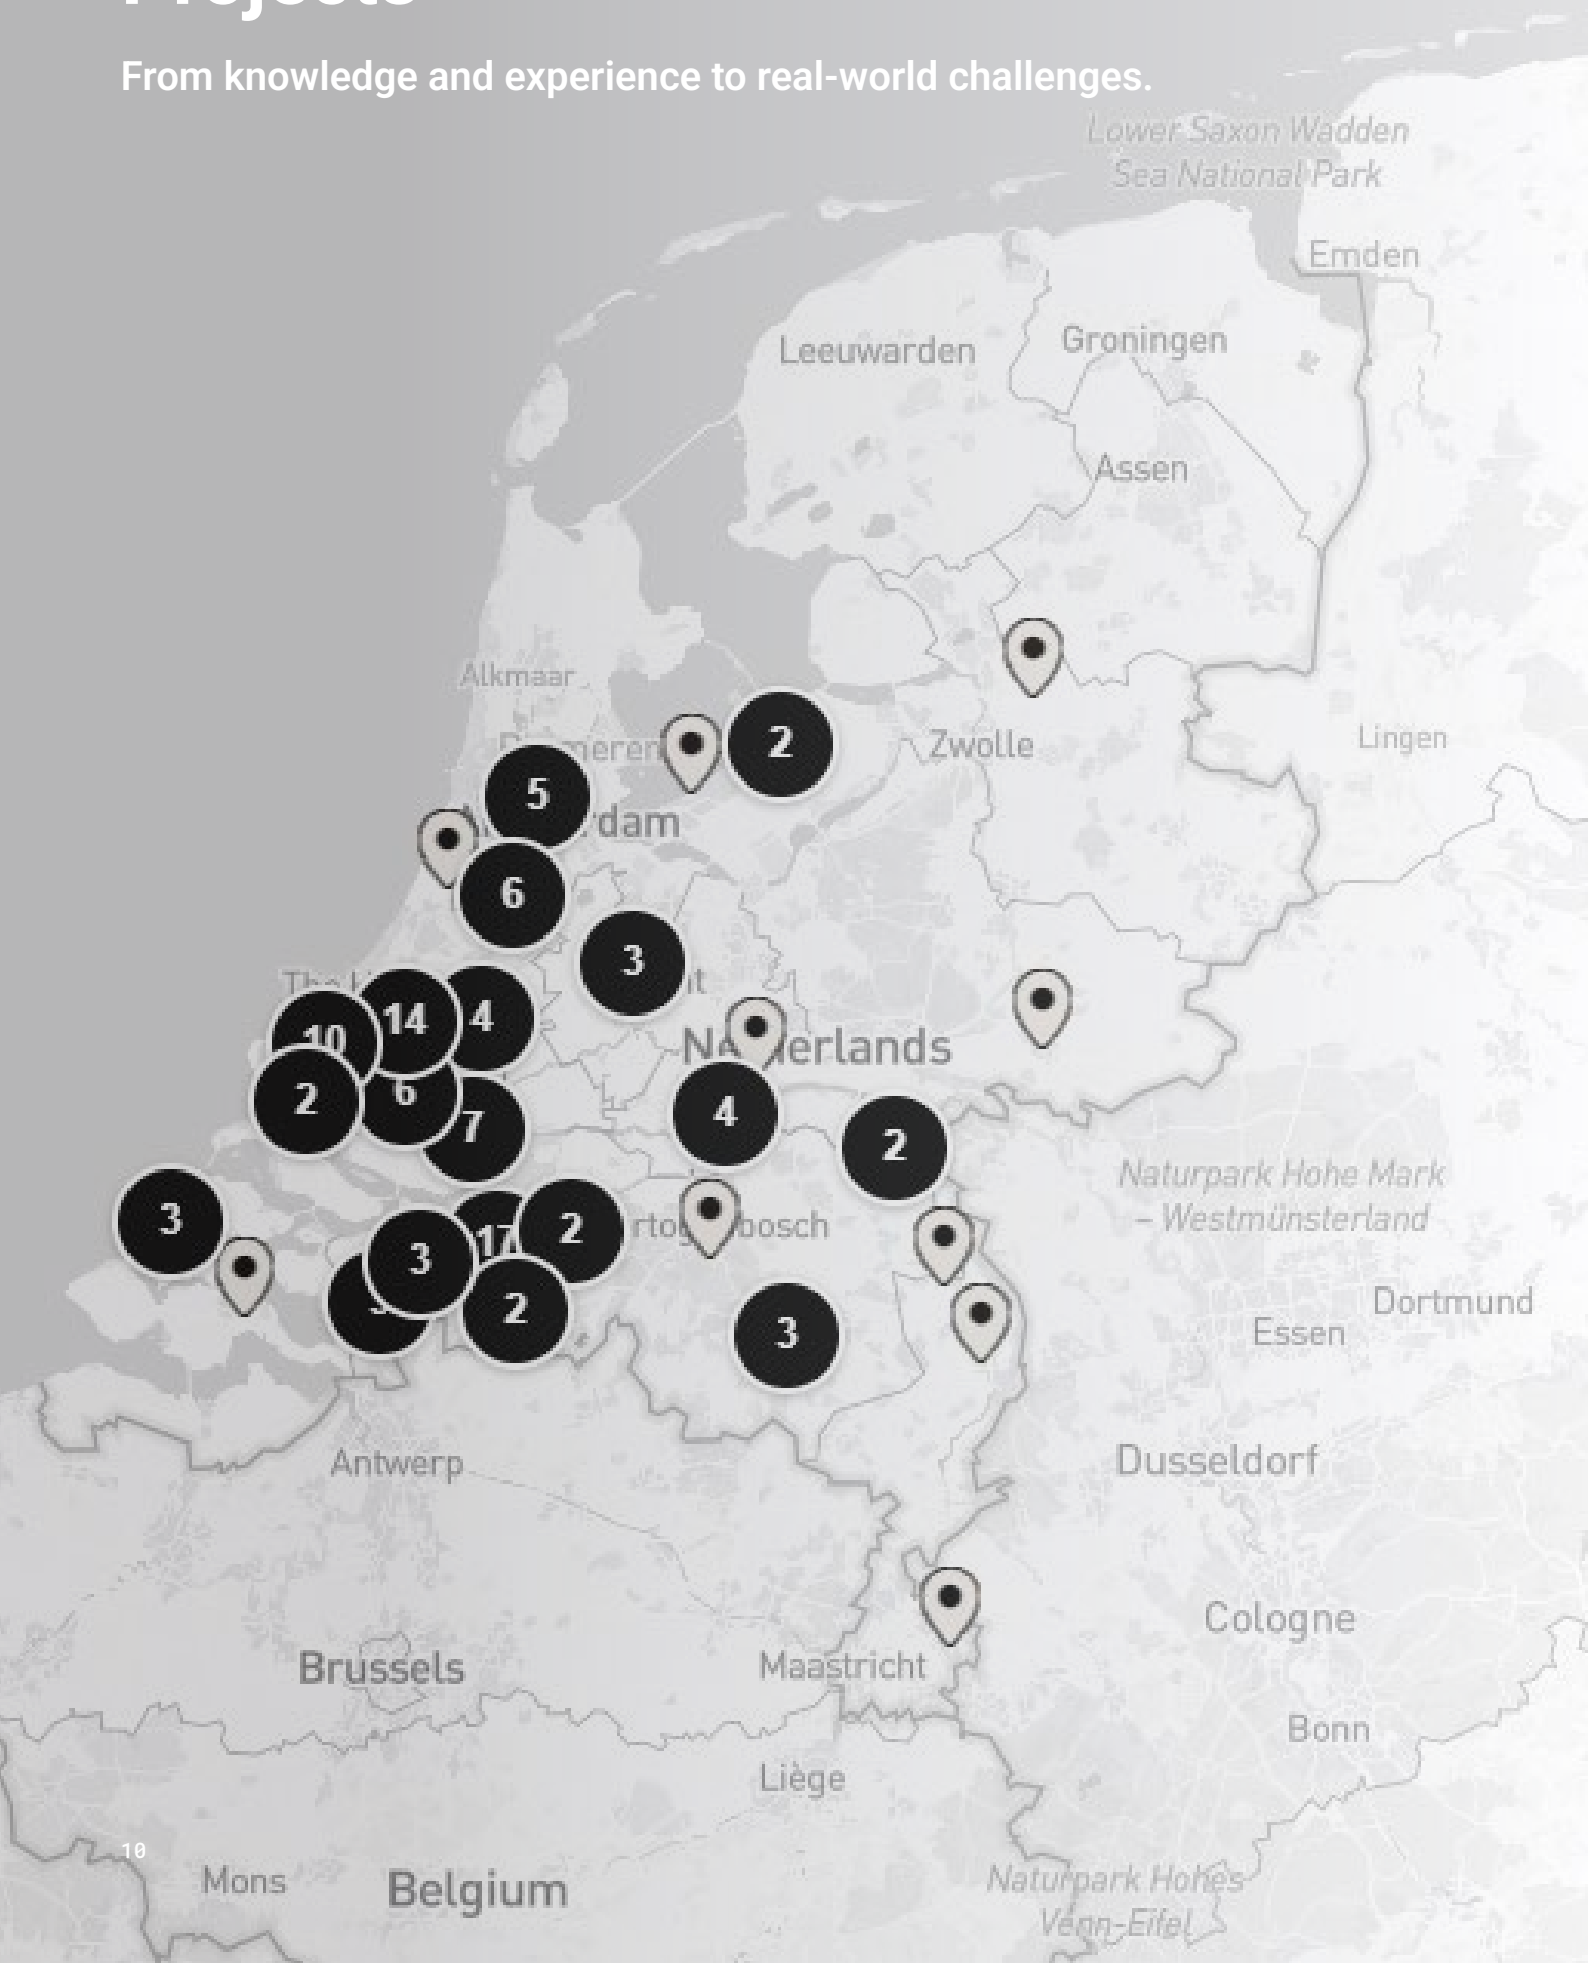

ADR & Lithium Storage

Large-Scale Logistics

Projects

From knowledge and experience to real-world challenges.

PROJECTS

A diverse portfolio across the Netherlands.

Convexarchitecten is based in Rotterdam and works on projects throughout the Netherlands and beyond. Over the years, we have built a diverse portfolio across a wide range of locations and for a variety of clients.

From small-scale commercial developments to large-scale logistics projects, every project calls for a tailored approach to the site, programme, business processes, and surrounding context. The projects featured in this chapter illustrate the breadth of our practice and how our expertise translates into tangible buildings and developments.

WDP Prinsenhil - Breda
